- GetThere

Tour Operator Allotments

easyJet offers committed seat allotments through our appointed agent Skytrail.

easyJet Distribution Charter

The objective of this distribution charter is to explain easyJet's policy relating to the distribution of easyJet's products and services by third parties and its purpose is to ensure the best possible levels of service for easyJet's customers at all times. The distribution charter applies to any third party using easyJet's data for the purpose of displaying, advertising, booking or selling any easyJet product or service.

1. easyJet's data is only to be accessed directly via the easyJet API or via an easyJet approved channel who has entered into API agreement with easyJet

Screen scraping in any form is not permitted

All API data must be used for the sole purpose as stated in the API agreement

2. All API data users must ensure the best possible customer service

They must ensure that the customer can always be contacted

They must ensure that customer contact details are passed to easyJet when the booking is made (email address and mobile telephone number) or that 24/7 customer service coverage is set-up to make contact with customers as instructed by easyJet in the event of disruption

They must ensure that other relevant customer information including (but not limited to) special needs are passed to easyJet when the booking is made

They must ensure that customers are advised of the need to check-in online prior to departure

Customers must accept easyJet's T&Cs and Privacy Policy at the time of booking

3. All API data users agree that easyJet may collect passenger contact details (email and telephone) in order to send notifications regarding disruption (flight change, flight cancellation etc.) and easyJet agrees that it will not auto opt-in API data users' customers' emails to its marketing database.

4. All API data users must adhere to the easyJet brand guidelines

The easyJet brand will be represented according to our brand guidelines

API data user must ensure that it complies with all applicable advertising laws/regulation across all territories

API data users agree not to procure sponsored links on any search engine which may cause customer confusion. API data users acknowledge that customer confusion may be caused by displaying urls or returning landing pages that may misleadingly appear to be provided by easyJet

5. API data user must ensure that customers are provided with accurate and complete information

They must provide transparent pricing across all booking steps

API data user must ensure that all flight prices displayed to the customer comply fully with all applicable local laws across all marketing channels including but not limited to prices listed on the provider's website and meta channels

API data user must ensure that any and all additional fees or charges added are clearly labelled so that customers understand that these fees are not charged by easyJet

The API operates on an "instant purchase" basis. API data users must ensure that customers are notified of their confirmed bookings and are sent relevant confirmations/acknowledgements as soon as payment is confirmed.

6. API data user agrees to adhere to all the points of the Distribution Charter in order to enjoy continued access to easyJet's data via approved channels

NOTE:

"easyJet's data" is the package of data easyJet prepares, which may include fares, schedules, seat availability, ancillary products and services.
