

OUR NEW CABIN BAGS POLICY

From 10th February 2021, all customers can bring one cabin bag on board free of charge which must fit under the seat in front of them. This will enable them to bring all the essentials for their journey or enough for a short trip.

What is the impact on business passengers travelling for the day ?

We know that many of our business customers making a day trip do not typically need a large cabin bag but that certainty around what can be taken on board with them remains important, as well of course as punctuality.

Our new policy will enable our customers to have certainty of what they will have with them on board, and the choice of adding a large cabin bag for those that need one. This will also reduce any delays associated with having to place excess cabin bags in the hold, improving the boarding experience and punctuality for all customers.

Need more space ?

Our **business fare** includes the essentials you need

Look out for **W fare class** (FLEXI fare) when booking online via a Self Booking Tool – which also includes free changes* and a hold bag for those who need it.

How will travellers booking online via Self Booking tools be affected?

We will be communicating with all indirect booking partners to advise them of the change before February, so that customers booking via any channel will have access to the latest information on cabin baggage allowance.

Customers booking our more restrictive fares (Y fare class - 'Standard' & B fare class 'Inclusive') will also be able to upgrade to an Up front and Extra legroom seat at time of check-in on easyJet.com or via the mobile app to be able to take a large overhead cabin bag (56x45x25cm) with them into the cabin.
